## 创建 Servlet 工程 (IDEA\_2021版)

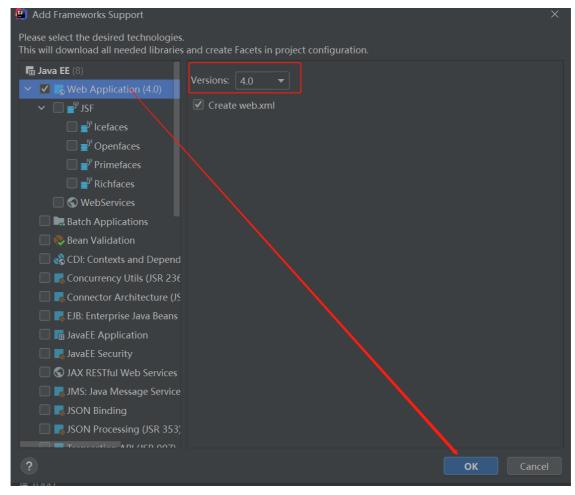

1. 新建 Java 项目

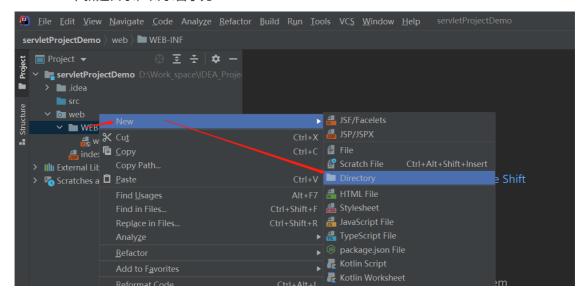

2. 右击项目名称,添加框架支持

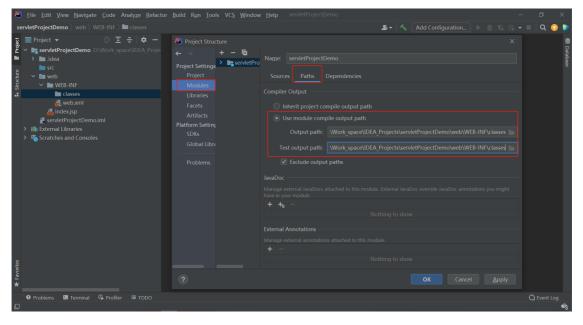

3. 勾选 Web Application, 默认 Web.xml 是 4.0 版本

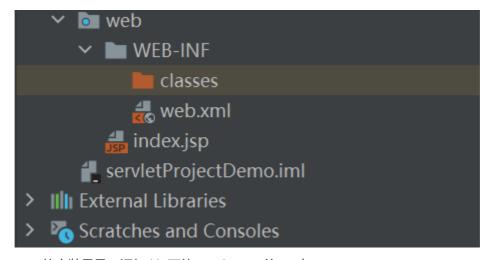

4. WEB-INF 下新建目录,目录名字为 classes

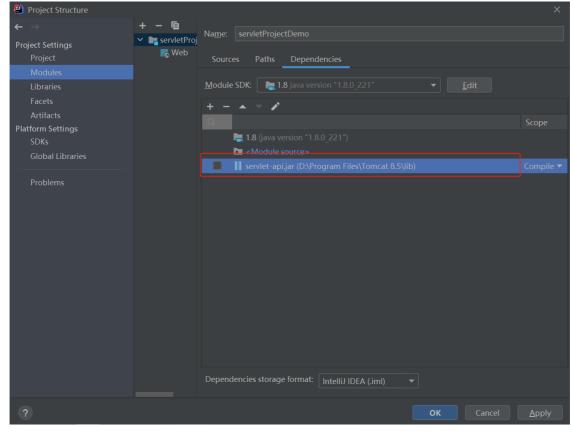

5. 打开项目结构,设置 classes 的属性和输出路径,设置后 classes 目录会变成橙黄色,如下图

6. 找到 tomcat 的安装目录,添加 lib 下的 servlet-api 的 Jar 包

7. 大功告成!!!!!!!
